Simplify your workflow

ELEVATING 3,500 BUSINESSES WORLDWIDE THROUGH SMART APPS FOR BUSINESS CENTRAL

Why use DINO?

Are you tired of the limitations in customizing Microsoft Dynamics 365 Business Central? In the "Age of Dinosaurs," it was a breeze to add fields to tables and make them available on related pages. However, with the shift to the "Modern Age" of Business Central, this process has become more complicated, requiring coding expertise and development time. But fear not! We at idyn understand the value of those handy features from the "Good Ol' Days," and that's why we developed DINO 365.

DINO is built for every Business Central user!

- End Users: DINO 365 is perfect for those who want to take control of Business Central without needing a developer. It simplifies customizations, making it easier to tailor the system to your specific needs.

- Microsoft Partners (Consultants): DINO 365 makes it easy for partners to implement minor changes to a customer's Business Central system – no coding required. This allows partners to provide quick, efficient solutions for their clients. DINO saves time and effort for both you and your customers, making customizations more efficient than ever.

How to Use DINO

Follow these simple steps to add fields to tables:

1. Download DINO 365 from AppSource.
2. Open the DINO 365 wizard.
3. Choose the table you want to add fields to.
4. Add the field(s) (Field Number, Name, Caption, Data Type).
5. Link the field(s) to the appropriate page(s).
6. Pay €1 or $1 via PayPal to complete the wizard.
   a. Deploy the customization to your environment.
   b. Export and store the custom app for import into another environment with another DINO 365 license.
7. Users will be prompted to pay €1 or $1 via PayPal to access the customized page(s).
8. Start using the newly added field(s)!
